

Amendments to the Specification

Page 11, please replace the paragraph spanning line 25 through page 12, line 8 with the following rewritten paragraph:

The jelly preparation of the present invention may be blended with pharmaceutically acceptable additives. Such additives include, for example, sweeteners such as-aspartameTM ASPARTAMETM (amino acids), saccharine, sodium saccharine, stevia, erythritol, sorbitose, xylitol, reduced maltose syrup, or the like (preferably-aspartameTM ASPARTAMETM, saccharine, sodium saccharine and/or stevia); flavors such as vanilla essence, lemon flavor, or the like; coloring agents; preservatives such as propyl p-oxybenzoate; and glycerin, and from these additives including the other additives, suitable additives may be selected and added.
